LAURA EDWARDS
PRIMARY EXAMINER

Art Unit: 1734

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Tom O'Rourke on 2/14/05.

The application has been amended as follows:

In the abstract:

In line 4, "a delivery means" has been changed to --tubing--.

In line 5, "means" (both instances) has been removed.

In the claims:

In claim 2, line 1, "wherein said" has been changed to --wherein each--.

In claim 2, line 2, --means-- has been inserted after "brush".

Claims 13-16 have been cancelled.

In claim 8, line 8, "last" has been changed to --least--.

Claims 13-16 have been cancelled without prejudice to Applicant's right to file a divisional application.

The following is an examiner's statement of reasons for allowance:

Claims 17/6-9, and 12 are allowable because there is no teaching or suggestion in the prior art of an apparatus for creating an image comprising the combination of a first support member having a suspended applicator member movable connected thereto, the suspended

applicator having a wind catcher attached thereto for receiving breezes of wind that power the applicator, the suspended applicator further provided with at least one reservoir of material to be applied to a substrate, the reservoir having a delivery means extending therefrom for transporting the material to a brush means, the brush means providing a random pattern of material to the substrate in response to the pressure from flowing air on the wind catcher.

Claims 18/11 are allowable because there is no teaching or suggestion in the prior art of an apparatus for creating an image comprising the combination of a first support member having a hanging applicator member movably connected thereto, the hanging applicator being provided with at least one reservoir of material to be applied to a substrate, said reservoir having a delivery means extending therefrom for transporting the material to brush means, the brush means providing a random pattern of material to the substrate in response to pressure from flowing air and wherein the first support member is a horizontal member being supported by at least one vertical member and wherein there is an anchor leg having a first end and a second end, the first end being adapted to rest on a support surface and the second end having an opening for receiving a vertical member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
